Summary: Python Developer with hands-on industry experience building scalable backend applications, RESTful APIs, and automation systems. Currently working as an ML & Python Engineer at Automation Technix, developing real-time data pipelines and industrial monitoring systems. Proficient in Django, Flask, REST APIs, SQL, MongoDB, and Python libraries including Pandas and NumPy. Experienced in Git-based version control, cloud basics, and agile delivery. Passionate about writing clean, efficient, and reusable code to solve real-world problems.

TECHNICAL SKILLS

- **Programming:** Python, SQL, C, JavaScript
- **Backend Frameworks:** Django, Django REST Framework, Flask
- **Frontend:** HTML, CSS, Bootstrap, JavaScript
- **Databases:** SQL Server, MongoDB, SQLite
- **Data Libraries:** Pandas, NumPy, Matplotlib, Seaborn
- **Tools & DevOps:** Git, GitHub, Postman, Docker (Basic), CI/CD (Basic)
- **Cloud & APIs:** RESTful APIs, Cloud Computing Fundamentals, Microservices (Basic)
- **Concepts:** OOP, MVC/MVT Architecture, Machine Learning Basics, LLM Fundamentals, TDD (Basic), Agile

KEY SKILLS

- Python Development • Django & Flask • RESTful API Design • MongoDB • SQL Databases
- Machine Learning Basics • LLM Evaluation • Docker (Basic) • Git & GitHub • Agile Methodology

PROFESSIONAL EXPERIENCE

ML & Python Engineer

Jan 2026 – Present

Automation Technix

India

- Designed and implemented Python-based backend systems for industrial plant monitoring and automation.
- Built and maintained RESTful data pipelines to collect, process, and store real-time sensor data using Python and SQL.
- Developed scalable data processing workflows using Pandas and NumPy for operational analysis.
- Created real-time reporting dashboards integrating backend Python scripts with front-end visualization layers.
- Collaborated with cross-functional teams to deliver features, debug issues, and optimize application performance.
- Managed source code and versioning using Git and GitHub across the development lifecycle.

PROJECTS

- **EcoDhara Live Reporting System (Python – Industrial Backend Project)** – Developed a live industrial reporting platform using Python for monitoring plant operational parameters in real time. Built backend data processing pipelines using Pandas and NumPy for cleaning and transforming sensor data. Integrated SQL database for structured real-time data storage and automated report generation. Designed interactive visualization dashboards to present plant performance metrics to operators.
- **News API (Django REST Framework)** – Built a production-ready RESTful News Management API using Django REST Framework with JWT-based authentication. Implemented user registration, login, logout, email verification, token blacklisting, and secure password management. Designed scalable backend models for articles, comments, likes, bookmarks, and categories. Applied OOP principles and MVT architecture for modular, maintainable codebase. (GitHub)
- **Smart Garage Management System (Django – Full Stack)** – Developed a full-stack Django web application (Car Care Hub) with MVT architecture covering authentication, session management, and role-based access control. Integrated responsive UI using HTML, CSS, Bootstrap, and JavaScript with a clean backend structure. Deployed to PythonAnywhere ensuring a stable and accessible production environment. (Live Link)
- **Stakeholder Insights and Performance Dashboard (Tableau)** – Built an interactive Tableau dashboard with KPIs, charts, and filters to analyze insurance premiums, profitability, and asset distribution. Enabled stakeholders to make data-driven decisions through dynamic drill-down analytics. (GitHub)

EDUCATION

Rajarshi Shahu College of Engineering <i>BE in Computer Science & Engineering (6.8/10)</i>	Buldhana, India <i>2021 – 2025</i>
• Relevant Coursework: Data Structures, Algorithms, Machine Learning, Database Systems, Operating Systems	
M.F. Vidyalyaya & Jr College <i>HSC - Science (65%)</i>	Sindhkhed Raja, India <i>2020 – 2021</i>
Shivaji Highschool <i>SSC (56%)</i>	Deulgaon Raja, India <i>2018 – 2019</i>

CERTIFICATIONS

- Python Full Stack Development + Data Analyst – Itpreneur (2025)
- Introduction to Generative AI – Google Cloud (Coursera, 2024)
- Data Analytics & Visualisation – Tata Group (Forage, 2024)
- Introduction to Cloud Computing – IBM (Coursera, 2024)

ACHIEVEMENTS

- Led a team of 5 as Project Coordinator for a college competition.
- Organised a college fest as Student Council President, managing a budget and coordinating 10+ events.

LANGUAGES

- English, Hindi, Marathi
